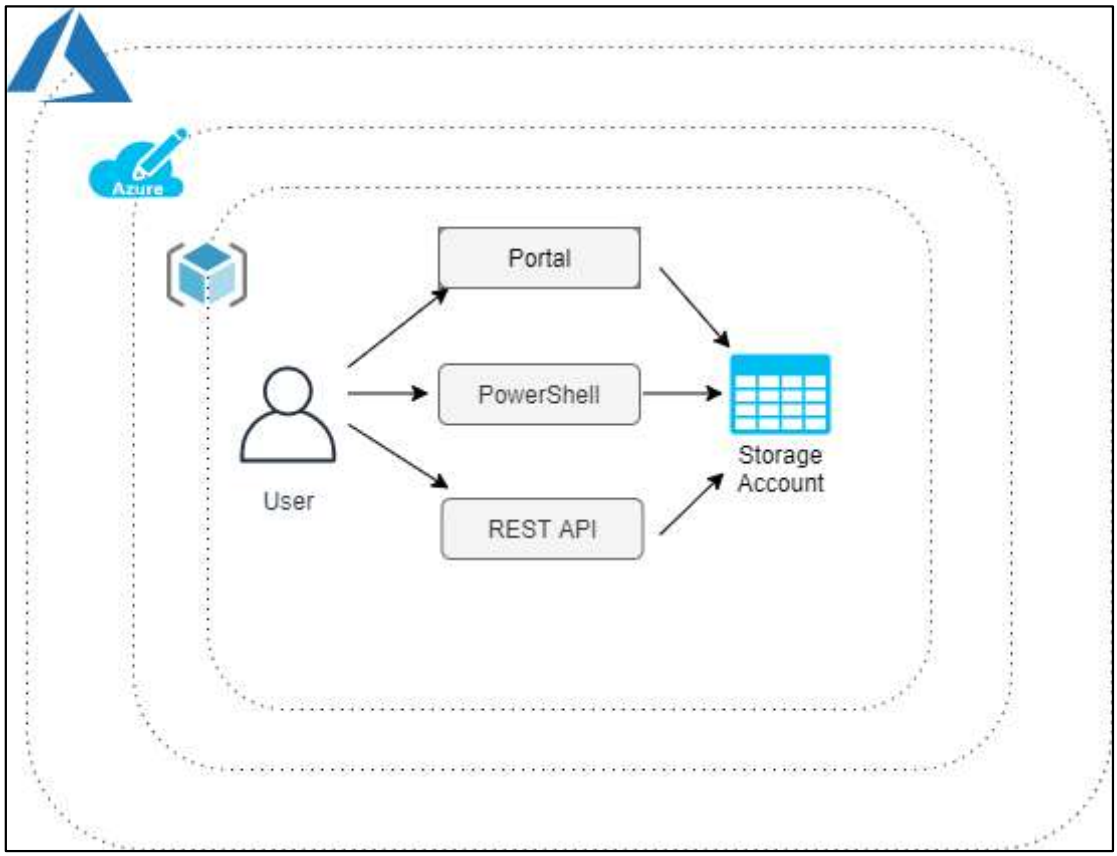
# 1. Create an Azure Storage Account

## *1.1 Description*

An Azure storage account contains all of your Azure Storage data objects: blobs, files, queues, tables, and disks. The storage account provides a unique namespace for your Azure Storage data that is accessible from anywhere in the world over HTTP or HTTPS. Data in your Azure storage account is durable and highly available, secure, and massively scalable. A general-purpose v2 storage account provides access to all of the Azure Storage services: blobs, files, queues, tables, and disks. In this lab exercise, you will learn how to create a storage account in Azure.

## *1.2 Architecture Diagram*

The diagram below displays a visual representation of the application architecture:



### *1.3 Lab Steps*

Follow the steps outlined below to achieve the objective of this lab exercise:

1. Storage Account creation from Azure Portal:
    a. Go to the Azure Portal.
    b. Search for **Storage account** in search bar and select it.
    c. Click on **Add Storage account**.
    d. Provide the following values:
        i. Resource Group: Select your Resource Group
        ii. Storage Account Name: <any_unique_name>
        iii. Location: Any (In case of any error, go as per the lab policy)
        iv. Leave other fields with their default values and proceed to **Next**.
        v. If you wish to use **Azure Data Lake Storage**, in the **Advanced** Tab, set Hierarchical Namespace to **Enabled**.
        vi. Leave all other fields with their default values and click on **Review+Create** > **Create**.

2. Storage Account Creation by PowerShell:
    a. Launch the PowerShell from your local or from Azure Cloud Shell.
    b. Use the following sample command to create a storage account:

```
New-AzStorageAccount -ResourceGroupName '<ResourceGroupName>' -Name
'<Storageaccountname>' -SkuName Standard_RAGRS -Location 'centralus'
```

3. Clean up resources:
    When you are done with your lab exercise, delete all the resources created by you.

### *1.4 Troubleshooting*

| S. No | Problem | Solution |
|---|---|---|
| 1 | Not able to select desired Region | Go as per the Lab Policy, look for any error and suggested options to be followed |
